Amendments to the Specification:

Please make the following amendments to the specification (material to be

inserted is in bold and underline, material to be deleted is in strikeout) or (if the

deletion is of five or fewer consecutive characters or would be difficult to see) in

double brackets [[]]):

Please replace the paragraph beginning at page 1, line 13, with the following

rewritten paragraph:

- Digital projection systems may be used to display a still or video image, or

to enable the image to be viewed simultaneously by a large or small audience. As

digital projectors become smaller and more versatile, they may be used in a variety

of different environments and positions, either temporarily or as a permanently

mounted fixture. In any environment, access to the internal components of the

projector may be hindered by the projector design, or the orientation of the projector,

making routine maintenance, repair, or upgrading of the projector more difficult. --
